Work

Assistant Vice President   Pune, Maharashtra

Deutsche Bank Operations International   Jun 2018 - Current

Working for The DWS Group GmbH & Co. KGaA (DWS), one of Deutsche Bank's associated, publicly traded asset manager. As an Engineering Manager - FrontEnd at DWS, I help in delivering quality products on time. I am responsible for managing, leading, and developing the front-end team whose main objective is to develop disruptive solutions for the bank. In addition, I am also involved in their personal and professional development while keeping them productive.

- Leading the development of User Interfaces with a compelling and uniform user experience across channels (web, mobile, and desktop) for digital applications built for various groups within the bank - Funds Treasury, Passives, Regulatory Reporting etc.
- Leading a team of 10 engineers and managing their technical deliverables. Managing their growth plans, coaching, and mentoring the team members and providing feedbacks via 1:1 sessions.
- Closely collaborating with various stakeholders (Architects, QA Manager, UX, PM, DevOps etc) located across Pune, Frankfurt, London, and New York to ensure the timely delivery of the key project initiatives.
- Supporting the development of new reusable components and long term goals of bank's Core Platform UI Libraries.
- Encourage the adoption of the best practices within the team - Agile Delivery, TDD, Peer Reviews, Brown Bag Sessions etc.
- Actively involved in lateral and graduate hiring programs. Contributing in tech challenges, quiz, and interviews.

Senior Software Engineer

Gurugram, Haryana

noon.com

Aug 2017 - Jun 2018

noon.com is an e-commerce website with a large catalog of products targeting customers in UAE, Saudi Arabia, Egypt and constantly expanding in the middle east. As a Senior Software Engineer I owned the responsibility for developing the front-end of entire logistics and supply chain comprising of several web and mobile applications.

- Work closely with Front-end architect, visual designer and back end team for the development of UI components to achieve pixel perfect designs in agile environment. Responsible for proving UI related front-end solutions requested by product owner and stockholders along with defects and bug fixes reported by the testing team.
- Ensuring goals were met by mentoring and coaching other team members including graduate interns and freshers.
- Collaborating with the devOps team to ensure delivery of cloud native projects using CI/CD tools including TeamCity and Jenkins.
- Involved in deploying mission critical projects on Google Cloud, and AWS Platforms.

Senior JavaScript Engineer

Remote

TalkValley LLC

Jul 2016 - Aug 2017

mentorstudents.org is a product startup based out of USA. It helps prospective students to speak with current/ex-students from various college programs of interest. It also helps current students speak with hiring managers from various companies. As a Senior JavaScript Engineer owned the responsibility of front-end and backend of a web application that provides a fully automated system recording interviews of the mentors/speakers and then edits, transcripts, and lists them for the users.

- SDLC Planning.
- Database Design.
- Implementation of Video conferencing using WebRTC (Licode).
- Lead a remote team of 5 developers.
- Helped other developers and training interns.

Web Developer

Mohali, Punjab

Simsaw Software Pvt. Ltd. (formerly Pink Hand Technologies Pvt. Ltd.)   Jul 2014 - Jul 2016

Pink Hand Technologies Pvt. Ltd. is a service based company with multiple clients mostly based in the U.S. As a Web Developer I owned the responsibility of developing high performance and scalable web and mobile applications for the clients.

- Work with OpenSource JavaScript technologies including NodeJS, AngularJS, ReactJS, Webpack and many more.
- Involve in the agile development methodologies and work closely with other teams for front-end as well as Backend development.

- Involve in the testing phase. Write test cases for Unit testing the code and fixing bugs reported by the QA teams.

Trainee Engineer   Mohali, Punjab

Simsaw Software Pvt. Ltd. (formerly Pink Hand Technologies Pvt. Ltd.)   Jan 2014 - Jun 2014

- Learn JavaScript and Web Development techniques.
- Collaborated with senior engineers on complex projects.
- Wrote all technical documentation for new software in development.
- Wrote clean, clear and well-tested code for various projects.
- Attended development team trainings, daily meetings and huddles.
